Summary

Analytical Data Analyst with 3+ years of experience in data informatics and statistical services. Expert in SQL, Excel, and Data Profiling to ensure high-level data quality and standardization across complex datasets. Proven track record in supporting data governance initiatives and managing comprehensive business glossaries to streamline corporate reporting.

Work Experience

Collection Officer – Data & Performance Reporting

January 2026 – Present

NEWARK FRONTIERS, KENYA

- Run data profiling on due-account portfolios by branch and region to support data governance and daily collection decisions.
- Develop management performance reports using Excel data informatics to compare opening and closing due accounts and collection rates.
- Support data standardization by auditing and validating due-account pipelines for completeness, consistency, and accuracy.
- Manage data quality by investigating discrepancies and exceptions in account data and communicating findings to support corrective action.
- Document customer-contact activity and promises-to-pay (PTPs) while tracking arrears performance in the business glossary.
- Run Excel-based analysis and reporting to identify high-priority accounts and optimize underperforming branches for group insurance datasets.
- Support data governance initiatives by translating portfolio data into concise management insights and actionable rankings.

Data Analyst / Statistical Services Attachee

June 2023 – September 2024

GRACE ONYANGO FOUNDATION FOR DIGITAL HEALTH, KISUMU, KENYA

- Managed statistical services through rigorous data processing, SQL-based analysis, and preparation of analytical outputs.
- Run data profiling and cleaned datasets to identify missing values and inconsistencies to improve overall data quality.
- Developed comprehensive statistical reports using quantitative evidence to support program decision-making and data informatics.
- Documented analytical findings and business term definitions for non-technical audiences to maintain the business glossary.
- Managed the data catalog and organization of research and statistical information to support data governance standards.

- Supported research outputs and presentations by providing verified quantitative data for digital health initiatives.

Volunteer / Programme Support

June 2025 – August 2025

CHILDLINE KENYA, KISUMU, KENYA

- Supported online child-safety education activities using SharePoint and Microsoft Teams for collaborative information sharing.
- Documented program activities and prepared presentations to ensure clear communication of safety education targets.

Deputy Chairperson / Organizing Secretary

April 2022 – April 2024

KENYA RED CROSS – EMBU CHAPTER, EMBU, KENYA

- Supported planning and coordination while managing documentation and reporting of chapter activities to stakeholders.
- Managed communication and scheduling with team members, ensuring administrative follow-up and operational efficiency.
- Developed strong leadership and stakeholder communication skills applicable to project management and data governance environments.
